INSTRUCTIONS — MAPS

INDUSTRIAL ZONE, TRACKS,

SPOT NUMBERS

Number **1**

ALBUQUERQUE

NEW MEXICO DIVISION

Instructions set forth below govern the operation of Car Location Inventory Control (CLIC) throughout the terminal of Albuquerque. The terminal is divided into nine zones with each zone having designated tracks and/or industries within its boundaries. Tracks are assigned specific numbers within the zones and spots on the tracks are given individual numbers. By using zone, track and spot numbers, we are able to print switch list which will reflect the exact location to which a car should be spotted.

A CLIC Spot Number will consist of six digits - the first two digits designate the zone to which the car is destined; the second two digits indicates the track number within the zone; the last two digits represent the actual spot along the track. Zone numbers will be preceded by a zero as there are less than ten zones.

### EXAMPLE OF CLIC SPOT NUMBER

All industries will be referred to by CLIC Spot Number rather than by name.

Switches have been painted with zone and track number shown on either target or stand. Spot numbers have been painted on doors, docks, bldgs., gates etc., where possible; otherwise, the proper spot can be determined by noting spot descriptions that are found just opposite zone maps on the following pages in this book.

These maps are not drawn to scale but merely serve as a guide in locating proper tracks or spots.

Instructions below specifically pertain to the physical switching, spotting and pulling of cars and are called particularly to the attention of all yardmen for their compliance:

THE YARDMASTER WILL HAVE COMPLETE CONTROL AND KNOWLEDGE OF ALL SWITCHING OF CARS.

SWITCHING IN TRAIN YARD

(1) All switching in train yard will be performed by use of switch list unless otherwise instructed by yardmaster.

(2) Disposition of car will be shown on list by yardmaster just opposite car initial. This disposition will be indicated by means of track and/or spot number.

(3) Yardmaster will indicate on switch list at which end of yards switching is to be performed.

(4) Yardmaster will indicate on switch list where cuts, if any, are to be made, as follows:

1st Cut \_\_\_\_\_  
2nd Cut \_\_\_\_\_  
Etc.

(5) Engine Foreman will switch cars according to list marked by yardmaster. Should engine foreman switch or place car to some location other than that marked on list, or makes a cut different than marked by yardmaster, he must indicate so on switch list and advise yardmaster of this promptly.

(6) Engine Foreman will advise yardmaster of any car not shown on list and any disposition made of it.

(7) Engine Foreman must notify yardmaster of any exceptions taken to list, such as no car, car not on list or car out of line.

(8) Yardmaster should be aware of all switching moves made in the yard and engine foreman must advise yardmaster of any extra moves.

SWITCHING AT INDUSTRIES

(1) All switching at industries will be performed by use of switch list unless otherwise instructed by yardmaster.

(2) Disposition to be made of car will be shown on list by yardmaster just opposite car initial. This disposition will be indicated by track and/or spot number.

(3) Engine Foreman will switch cars according to list marked by yardmaster. Should engine foreman switch or place car to some location other than that marked on list, he must indicate so on list and advise yardmaster of change.

(4) If car is not actually spotted but left on that industry's track, foreman will indicate "On Track Not Placed" in the following manner OT N P. If car is placed on some other track foreman will indicate on list "Not Placed left on Track (Number)" in the following manner N P Track Number. (Example: ATSF 620510 N P 0535).

(5) Engine Foreman will advise yardmaster of disposition made of car or cars not shown on list.

(6) Engine Foreman must notify yardmaster of any exceptions taken to list, such as no car, car not on list, etc.

(7) If an industry request service not shown on foreman's list, engine foreman should obtain such request in writing and deliver to yardmaster after switching completed. If unable to obtain written request from industry foreman should record name of person requesting service on switch list showing service requested and performed

(8) If a car or cars other than ones ordered into industry by the yardmaster is spotted, engine foreman must indicate on switch list car number spotted and notify yardmaster of substitution.

(9) Engine Foreman will show on switch list time switching is completed at each industry.

(10) Yardmaster should be aware of all switching moves made at industries and engine foreman must advise yardmaster of any extra moves.

(11) After switching is completed engine foreman will indicate on switch list any work not completed, show time all switching on that list is completed, sign his name and return switch list to yardmaster.

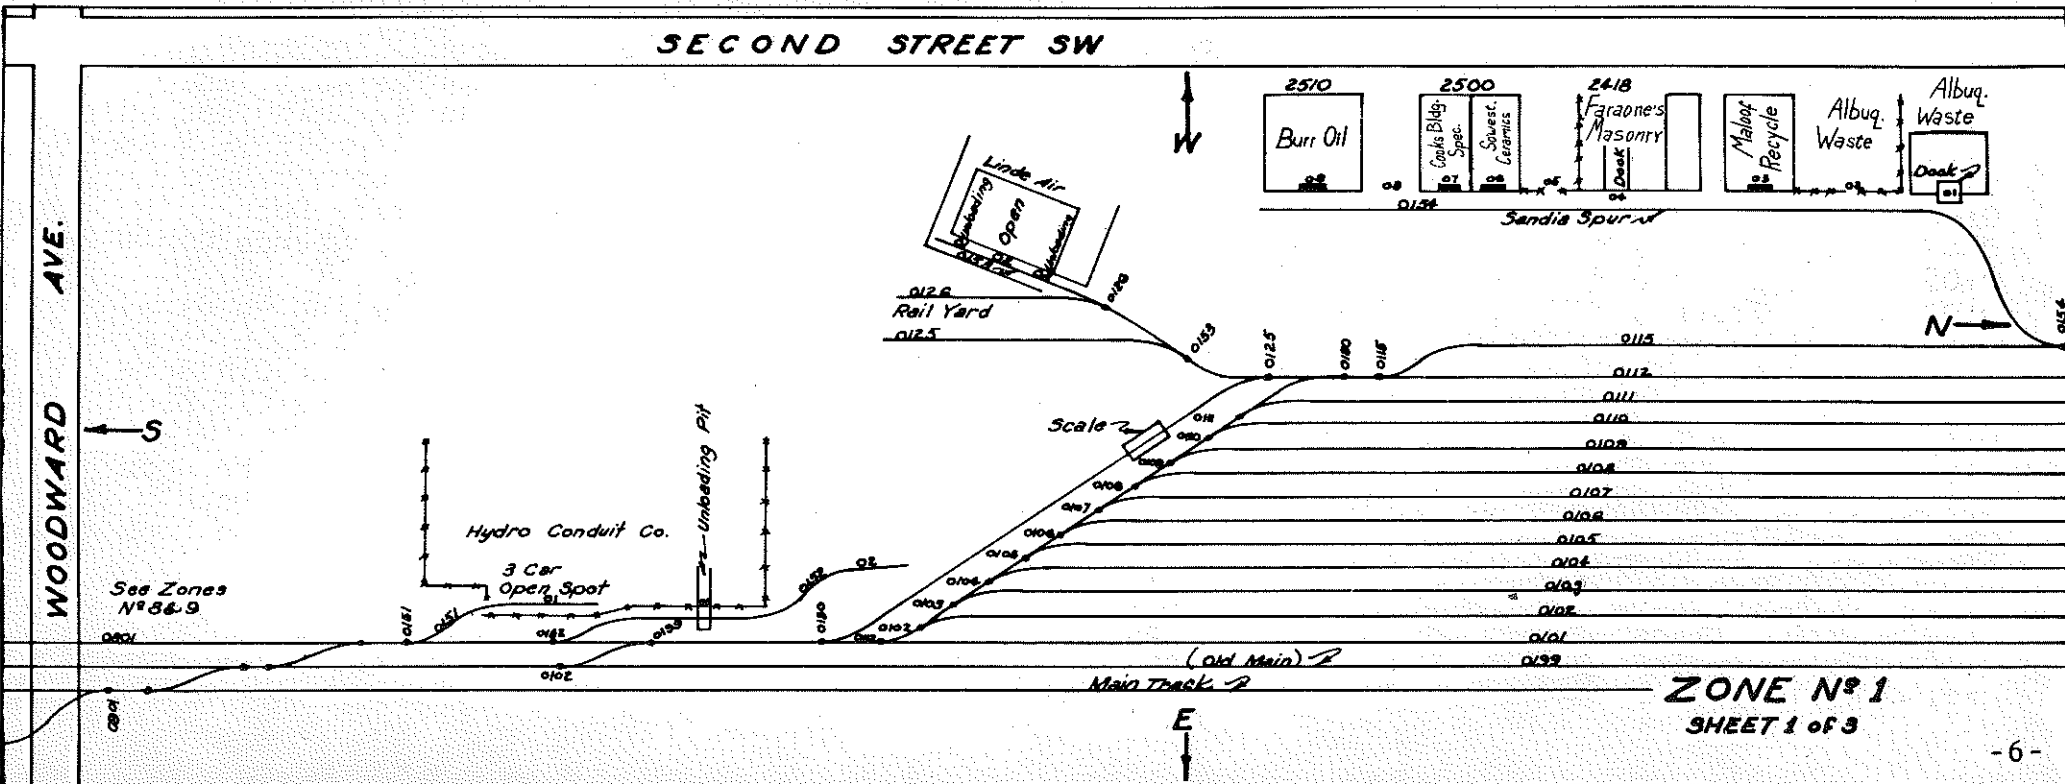

For observation and guidance, the following codes may be shown on switch list preceding car initial:

B1 - Bad Order  
C1 - Condemned Car  
CU - Car completely unloads  
DN - Dangerous  
EP - Empty to be placed, or placed for loading  
EX - Explosive  
HB - Hold for billing  
HC - Hold for charges or permit  
HD - Hold for disposition  
HE - Head end movement only  
PU - Car partially unloads  
RE - Rear end movement only  
TU - Turn car and respot  
WH - Weigh  
XX - Do not move this car

Good communication is essential for a successful C L I C operation. The complete cooperation is solicited of every employee.
