CAR LOCATION INVENTORY CODES

This booklet contains instruction and maps for the Car Location Inventory Code (CLIC) and procedures governing the Work Order Document System.

Maps are not drawn to scale and are to be used only as a guide to locating customer and yard tracks and the numbers assigned to them and in no way circumvents compliance with operating rules and other instructions.

The geographical area covered in this booklet is divided into zones. Each zone has designed tracks and/or industries within its boundary.

A CLIC number will consist of six digits. The first two digits designate the zone; the second two digits indicate the track number within the zone; the last two digits represent the actual spot along the track.

The combination of the zone-track-spot number is known as the "Car Location Inventory Code" (CLIC).

The CLIC number will be used for switching and reporting purposes rather than the industry or track name.

****EXAMPLE OF CLIC NUMBERS****

12	22	04	_____
			Spot Number
			Track Number
			Zone Number

All switch targets or stands have been painted with a combination of the zone and track number.

Spot numbers have been painted on doors, buildings, gates, etc., wherever possible.

WORK ORDER DOCUMENT

A work order document is any written or verbal instruction pertaining to the handling of cars issued to yard or road crews requiring work to be performed during their tour of duty.

NOTE: Exceptions to written work orders must be noted on the work orders according to current instruction; cars handled on verbal work orders must be reported on the prescribed form.

Conductors and Engine Foremen will be furnished work orders during their tour of duty.

This document will specify the cars to be picked up or set out at various stations, industries or interchange tracks serviced by the train or switch job.

Certain information (described below) must be recorded on the work order document by the Conductor or Engine Foreman. Prior to turning in the document at the designated reporting station, it must be dated and signed even if no work was accomplished. This is necessary to comply with switching and demurrage tariffs as well as other rules and regulations.

BO - Bad Order
ND - Work Indicated Not Done (State Reason)
NIT - Car Not In Train Or Not On Track
OTCC - Car On Track Carriers Convenience
OTNP - Car On Track Not Placed
PULL - Car Pulled, Time and Date
SPOT - Car Spotted, Time and Date

Conductor/Engine Foreman must make notation on work order of any exceptions taken to the work order, such as no car, car not on list, car out of line, car is hazardous, excess dimensions (when the information is not so indicated on work order), car is carded rear or head end movement, or any other exceptions noted.

If switching is performed without a work order, the Conductor or Engine Foreman must complete the prescribed form showing all the information required above and turn it at the designed reporting station.

If an industry requests service not shown on work order, Conductor/Engine Foreman should obtain such request in writing. This request is to be turned in with work order for processing. If unable to obtain request in writing, Conductor/Engine Foreman should record on work order the name of the person making request and the service requested and performed.

For observation and guidance, the following codes may appear on work order:

AI - Agricultural Industries
B1 - Bad Order
BA - Blasting Agent
BT - Bar Table (novans/containers)
CD - Condemned
CG - Cargill
DG - Dangerous
DH - Do Not Hump
DU - Do Not Uncouple
EC - Empty Container (speed restricted 55mph)
EQ - Union Equity or Equity Export, Houston
FW - Flammable Solid "W" (Dangerous when wet)
HE - Head End Only
HL - High Wide Load
HV - High Value
IP - Interchange Prohibited
IPSW - Interplant Switch (Respot Car)
LS - Handle in Local Service Only
MRXX - Mechanical Refrigeration Maintain "XX" Degrees
MCNR - Mechanical Car or Trailer - No Refrigeration Required
ND - Do Not Divert
NP - No Placards Required
OR - Other Regulated Material
OX - Oxygen
PB - Poison
PE - Houston Public Elevator
RE - Rear End Only
RM - Radioactive Material
REJT - Car Rejected by Shipper
RSPT - Respot Due to Railroad Error
SO - Car/Van Billed Shippers Order
TURN - Turn Car & Respot
WH - Weigh Heavy
WI - Waive Inspection - Set Direct
WL - Weigh Light
XA - Explosive A
XB - Explosive B
XX - Do Not Move This Car
ZZ - Cryogenic Liquid Subject to ATSF Operating Rule 103N

GOOD COMMUNICATION AND COMPLIANCE WITH INSTRUCTIONS IS ESSENTIAL FOR A COMPLETE AND SUCCESSFUL OPERATION. YOUR REPORTINGS ARE THE KEY TO ACCURATE RECORDS. THE COMPLETE COOPERATION OF EVERY EMPLOYEE IS SOLICITED AND APPRECIATED.
