CAR LOCATION INVENTORY CODE

This booklet contains instructions and maps for the Car Location Inventory Code (CLIC) and procedures governing the Word Order Document System.

Maps are not drawn to scale and are to be used only as a guide to locating customer and yard tracks, the numbers assigned to them, and in no way circumvents compliance with operating rules and other instructions.

The geographical area covered in this booklet is divided into zones. Each zone has designated tracks and/or industries within its boundary.

A CLIC number consists of six digits. The first two digits designate the **zone**; the second two digits indicate the **track number** within the zone; the last two digits represent the actual **spot** along the track.

The CLIC number is used for switching and reporting purposes rather than the industry or track name.

All switch targets or stands have been painted with a combination of the zone and track numbers.

Spot numbers have been painted on doors, buildings, gates, etc., wherever possible.

Example of CLIC Number

12 22 04

WORK ORDER DOCUMENT

A work order document is any written or verbal instruction pertaining to the handling of cars issued to yard or road crews requiring work to be performed during their tour of duty.

NOTE: Exceptions to written work orders must be noted on the work orders according to current instructions; cars handled on verbal work orders must be reported on the prescribed form.

Conductors and Engine Foremen will be furnished work orders during their tour of duty.

This document specifies the cars to be picked up or set out at various stations, industries or interchange tracks serviced by the train or switch job.

Certain information (described below) must be recorded on the work order document by the Conductor or Engine Foreman. Prior to turning in the document at the designated reporting station, it must be dated and signed even if no work was accomplished. This is necessary to comply with switching and demurrage tariffs as well as other rules and regulations.

- BO - Bad Order
- ND - Work Indicated Not Done (State Reason)
- NIT - Car Not in Train or Not on Track
- OTCC - Car on Track Carriers Convenience
- OTNP - Car On Track Not Placed
- PULL - Car Pulled, Time and Date
- SPOT - Car Spotted, Time and Date

The Conductor/Engine Foreman must note on the work order any exceptions taken to the work order, such as no car, car not on list, car out of line, car is hazardous, excess dimensions (when the information is not so indicated on work order), car is carded rear or head end movement, or any other exceptions noted.

If switching is performed without a work order, the Conductor or Engine Foreman must complete the prescribed form showing all the information required above and turn it in at the designated reporting station.

If an industry requests service not shown on work order, the Conductor/Engine Foreman should obtain such request in writing. This request is to be turned in with work order for processing. If unable to obtain request in writing, the Conductor/Engine Foreman should record on work order the name of the person making request and the service requested and performed.

For observation and guidance, the following codes may appear on the work order:

- AI - Agricultural Industries
- BI - Bad Order
- BA - Blasting Agent
- BT - Bare Table (no vans or containers)
- CD - Condemned
- CG - Cargill
- DG - Dangerous
- DH - Do Not Hump
- DU - Do Not Uncouple
- EC - Empty Container
(speed restricted 55 mph)
- EQ - Union Equity or Equity Export,
Houston
- FW - Flammable Solid "W" (Dangerous
when wet)
- HE - Head End Only
- HL - High Wide Load
- HV - High Value
- IP - Interchange Prohibited
- IPSW - Intraplant Switch (Respot Car)
- LS - Handle in Local Service Only
- MRXX- Mechanical Refrigeration Maintain
"XX" Degrees
- MCNR- Mechanical Car or Trailer - No
Refrigeration Required
- ND - Do Not Divert
- NP - No Placards Required
- OR - Other Regulated Material
- OX - Oxygen
- PB - Poison
- RE - Rear End Only
- RM - Radioactive Material
- REJT - Car Rejected by Shipper
- RSPT - Respot Due to Railroad Error
- SO - Car/Van Billed Shippers Order
- TURN- Turn Car & Respot
- WH - Weigh Heavy
- WI - Waive Inspection - Set Direct
- WL - Weigh Light
- XA - Explosive A
- XB - Explosive B
- XX - Do Not Move This Car
- ZZ - Cryogenic Liquid Subject to ATSF
Operating Rule 103N

Good communication and compliance with instructions are essential for a complete and successful operation. Your reportings are the key to accurate records. The complete cooperation of every employee is solicited and appreciated.

To All CLIC Bulletin Users:

It is our intention that this document accurately reflect field conditions. If you notice any changes to these conditions, such as track locations, road crossings, local names of roads, industry names, etc., we would appreciate hearing from you in order to ensure the continued accuracy of the next issue of this CLIC Bulletin. Please send notice of any changes to:
